DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-25, drawn to a system force measuring force and moment.

Group II, claims 26-27, drawn to Elastic Hooke's joint.

2. The inventions listed as Groups above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Specifically independent claims 1 and 8 disclose a method and a device for measuring forces and moments acting upon a structure with elements connected together through specific connections and related measuring means. Therefore, the technical feature is a measuring system.

On the other hand the independent claim 26 discloses an elastic Hooke's joint for joining two elements and permitting a relative movement between said two joined elements. This has nothing to do with a measurement system as of the claims Group I. The technical features of this claim defines constructional details of said Hooke's joint: bending elements comprising a cross

consisting of two perpendicular arms joined by a spacing cross member, in which two pairs of thin plate are fixed to the arms. The problem solved by these technical features is to provide an elastic Hooke's joint which is able to join two elements with a spherical joint binding type having practically zero friction and clearance and no measurements.

3. Affirmation of this election must be made by applicant in replying to this Office action.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
